Organizational Profile

Chartered in 1955, Methodist Hospital is the pioneer facility of the now world-renowned South Texas Medical Center. Opened in 1963, Methodist Hospital has grown to be the flagship facility of the Methodist Healthcare System¹, San Antonio's largest and most preferred health care provider. Methodist Hospital maintains this excellent reputation with a commitment to the hospital's value statement that defines quality as meeting the customer's needs by exceeding their expectations. Methodist Hospital offers a broad range of specialties including cardiology, oncology, emergency medicine, neurosciences, maternity care, gynecology and orthopedics. Methodist Hospital is accredited by the Joint Commission in stroke care and is designated as an accredited Chest Pain Center.

Our Mission: Serving Humanity to Honor God by providing exceptional and cost-effective health care accessible to all.

Our Vision: To be world-class

Our Values: I-CARE: Integrity, Compassion, Accountability, Respect, Excellence

Our Core Competency: Building partnerships to serve our community.

Community Benefits Committee – Guiding Community Outreach

The Methodist Healthcare System Core Competency, *building partnerships to serve our community*, enables achievement of the mission of service to the community (Serving Humanity) through compassionate service, efficiency, and effectiveness with a servant leadership attitude (being responsible stewards of Methodist Healthcare's assets while honoring God). The Mission supports regular, consistent impactful contributions to strengthen the health of the community guided by the Community Benefits Committee. Formed in 1995 as a result of the partnership agreement, the Community Benefits Committee is a standing committee of Methodist Healthcare. The committee meets quarterly to review community benefits provided by Methodist Healthcare. Members include representatives from Methodist Healthcare's Community Board, Board of Governors and leadership from Methodist Healthcare and Methodist Healthcare Ministries, as well as key staff members from each organization. An annual community report is submitted by the president and CEO of Methodist Healthcare, to the Community Benefits Committee, Board of Governors, Community Board, and MHM

¹Methodist Healthcare System is comprised of 26 facilities, including eight hospitals. Methodist Healthcare was formed as a 50-50 co-ownership between the Methodist Healthcare Ministries of South Texas (MHM) and HCA. MHM is a private, faith-based, not-for-profit organization dedicated to providing medical and health-related human services to low-income families and the uninsured in South Texas. MHM is second only to the government in providing health care to the indigent population in a 72-county area. HCA, based in Tennessee, is the nation's leading provider of health care services, composed of more than 250 hospitals and freestanding surgery centers in 20 U.S. states and in the United Kingdom.

recapping the complimentary programs offered to the community, a great many of them directed to those less fortunate. The report includes a summary trend chart of actual services. In addition to the annual report, a quarterly report is presented on various aspects of Methodist Healthcare’s community involvement focused on measuring community activity that benefits the underserved.

Population Served²

In 2015, Methodist Hospital served

Emergency Department Patients	Inpatients	Outpatients	Outpatient Surgery	Total
134,657	37,673	95,421	14,017	281,768

In 2016, Methodist Hospital budgeted for

Emergency Department Patients	Inpatients	Outpatients	Outpatient Surgery	Total
141,861	38,920	95,156	13,451	289,398

Methodist Hospital’s service area of 53 Zip codes located in 13 (Bexar, Bandera, Comal, Dimmit, Guadalupe, Kendall, Kerr, Kinney, Maverick, Medina, Uvalde, Val Verde and Zavala) has an estimated population of over 1.7 million³. Since this geographic area is majority Hispanic, we see this reflected in our patient population. Our service area also includes underserved rural areas.

² The numbers are representative of Methodist Hospital and its campus, Methodist Children’s Hospital combined.

Figure 3 Population Age and Gender⁶

To help meet the needs of our rural communities, Methodist Healthcare manages Medina Regional Hospital in Hondo, Texas, Val Verde Regional Medical Center in Del Rio, Texas, Cuero Community Hospital in Cuero, Texas, and Frio Regional Hospital in Pearsall, Texas. This enables these hospitals to provide the community with resources that otherwise may not be available. Methodist Healthcare provides a neuro telemedicine program, Tele-Stroke, to Connally Memorial Medical Center (Floresville, Texas), Guadalupe Valley Regional Medical Center (Seguin, Texas), Fort Duncan Regional Medical Center (Eagle Pass, Texas), Dimmitt Regional Hospital (Carrizo Springs, Texas), Laredo Medical Center (Laredo, Texas), Peterson Regional Hospital (Kerrville, Texas), Medina Regional Hospital (Hondo, Texas), Frio Regional Hospital (Pearsall, Texas), South Texas Regional Hospital (Jourdanton, Texas), Memorial Hospital (Gonzales, Texas) and Cuero Community Hospital (Cuero, Texas). The Tele-Stroke program provides these rural Texas hospitals access to Methodist Healthcare neurologists who can remotely diagnose and treat stroke patients when minutes count. Methodist Healthcare also has abdominal transplant program satellite clinics in numerous Texas cities including Lubbock, Corpus Christi, McAllen, Laredo, Temple, Austin and will open another clinic in El Paso.

The majority of the population Methodist Hospital serves is Hispanic. In order to meet the needs of those whose primary language is not English, Methodist Hospital offers:

- Language interpretation – 200 languages available 24/7, 365 days a year through a relationship with STRATUS. Methodist Healthcare has video remote interpretation (VRI) throughout the organization, for patients and families requiring language assistance.

⁶ Based on PCensus a trademark of tetrad Computer Applications Inc. Utilizing US Census Data

- Methodist Hospital provides materials and forms in Spanish (additional languages upon request). As a large percentage of the population turns to the internet for health and wellness information, Methodist Healthcare's website, SAHealth.com, is available in Spanish.

Community Needs Assessment Methodology, Process and Community Involvement

Methodology

Methodist Healthcare is a founding member of The Health Collaborative (THC), a nonprofit convening organization that brings together hospital systems, other health care organizations, local government and nonprofit organizations in Bexar County to identify and solve community health issues through collaboration. THC has conducted its Bexar County Community Health Needs Assessment (BCCHNA), an in-depth look at local health, since 1998 and Methodist Healthcare has used this assessment to analyze, prioritize and act on the health-care needs of the community. Conducted every three years, the BCCHNA has evolved into a national model recognized for its comprehensiveness and for the community engagement and collaboration it has fostered.

Members of THC include: Methodist Healthcare, MHM, Appdiction Studio, Baptist Health System, Bexar County Department of Community Resources, CHRISTUS Santa Rosa Health System, Community First Health Plans, Our Lady of the Lake University, the City of San Antonio Metropolitan Health District, University Health System, University of Texas Health Science Center at San Antonio Department of Family and Community Medicine, SA Clubhouse, ILX Health Strategies Group and the YMCA of Greater San Antonio. Funders of the THC Community Health Assessment are Baptist Health Foundation, Bexar County, the Kronkosky Charitable Foundation, the United Way of San Antonio, San Antonio Metro Health Department and MHM.

THC bases its community health assessment on the social determinant model which views outcomes as a product of health-related behaviors and the behaviors themselves as a likely product of social dynamics at the level of the social context of the neighborhood. The BCCHNA uses data from the San Antonio Metropolitan Health District's annual Health Profiles, a report which looks at health trends, area demographics, information on prevalence of disease, and other findings. Health Profiles looks at the population by age, by gender and by race/ethnicity as it relates to current population, projected population, birth, education, ZIP code and census tract. It also provides an in-depth look at birth trends, including fertility rates, maternal health, maternal age and ethnicity, teen births, low birth weight and premature trends and mother's BMI and weight gain. Youth indicators examined include juvenile probation, family violence, immunization rates, and child abuse. Deaths are examined by infant mortality rate and causes, life expectancy by race/ethnicity and gender, all causes of death, and years of potential life lost. The BCHNA also draws from the following data sources: Population and housing data from the U.S. Census Bureau; population estimates and projections from the Texas State Demographic Center at the University of Texas at San Antonio; social and economic conditions data from the U.S.

Census Bureau American Community Survey; crime data from the U.S. Department of Justice Uniform Crime Report; vital statistics, Behavioral Risk Factor Surveillance System (BRFSS), injury, hospital discharge, hospital bed, and health professions data from the Texas Department of State Health Services; Medicaid and public benefits data from The Texas Health and Human Services Commission; and communicable disease and vital statistic data from the San Antonio Metropolitan Health District.

Finally, data is collected at the neighborhood level with the intent of describing the social contexts that possibly give rise to health-related behaviors described in the Health Profiles and BRFSS survey data. Discussion groups and interviews were conducted city-wide with over 160 participants, ranging from community residents, service providers, government staff and officials, and advocates for the health of Bexar County’s low-income, medically-underserved and minority populations (See Community Partners). These interviews and meetings took place during March and April of 2016. The Health Collaborative contracted with Community Information Now (CI:Now), a local data intermediary serving south central Texas, for quantitative data collection and analysis and for development of the assessment narrative.

The final assessment was released by THC and local city and county officials at a breakfast meeting whereby a cross section of grassroots and city leaders were invited as well as participants from the focus groups and one-on-one interviews conducted for the assessment. The Executive Summary of the assessment was provided to all attendees.

In order to assess the rural areas Methodist Healthcare serves, University Health System’s (UHS) Regional Healthcare Partnership (RHP) 6 plan was utilized. Thee Texas Health and Human Services Commission established geographic boundaries for new Regional Healthcare Partnerships (RHP). Each RHP has developed a plan that identified the participating partners, community needs, proposed projects and funding distribution. RHP 6 is anchored by University Health System and includes the following counties: Atascosa, Bandera, Bexar, Comal, Dimmit, Edwards, Frio, Gillespie, Guadalupe, Kendall, Kerr, Kinney, La Salle, McMullen, Medina, Real, Uvalde, Val Verde, Wilson, and Zavala

Identified Community Needs: Working Together to Meet the Goals

In order to work collaboratively with other health care systems and organizations, businesses and nonprofits and make a true impact in our community, Methodist Healthcare has adopted the health priority areas based upon the 2016 three-year Bexar County Community Health Assessment. The health priority areas for our hospitals listed in priority order (these same five priority areas have not changed since the last community health improvement plan adopted in 2014):

Community Health Priority No. 1: Healthy Eating and Active Living

The percentage of Bexar County adults who consumed fruits and vegetables five or more times per day has remained flat over recent years, estimated at 17.1% (14.2%-20.5%) in 2011 and 15.4% (11.8%-19.8%) in 2013. Although the point estimate is lower in 2013, the confidence intervals overlap almost completely, meaning there was actually little or no real change among BRFSS respondents. The news is better for sugar-sweetened drinks with the percent of adults reporting that they never drink sugar-sweetened beverages increasing from 22.7% (16.9%-29.7%) in 2012 to 36.0% (31.2%-41.1%) in 2014.

Because the confidence intervals do not overlap at all, there clearly was a true increase among respondents

Community Health Priority No. 2: Healthy Child and Family Development

Although the birthrate among females aged 15 to 19 continues to decline, the percentage of births to mothers receiving prenatal care in the first trimester has also declined, leading to an increase in the rate of hospitalizations for complications of pregnancy or childbirth.

Community Health Priority No. 3: Safe Communities

Although the numbers point to crime rate decreasing overall in Bexar County, there are other contributing factors to “Safe Communities”. Motor vehicle accidents are a common cause of death among children age one to 14, pointing to the importance of child safety seats and seat belts as well as adult and older teen driver behaviors. Transportation is seen as one of the greatest challenges for the region for those who do not have private vehicles or easy access to public transportation.

Community Health Priority No. 4: Behavioral and Mental Well-Being

Health is about more than the physical body. Mental health is related to how people think, feel and act as they cope with life—how they handle stress, relate to others and make choices. In Bexar County, There is growing clinical recognition of the impact of mental health conditions and disorders on overall health status and costs. There does appear to be a steady increase in the mental illness related hospitalization rate between 2010 and 2014. The goal is to improve comprehensive behavioral health services and access for all.

Community Health Priority No. 5: Sexual Health

One of the most pressing health concerns voiced by Bexar County residents is teen pregnancy. Although the birth rate to teens ages 15-19 has declined in Bexar County, it is still an overwhelming concern. In addition, sexually transmitted infections can threaten people of any age, including unborn babies. While syphilis can be easily detected and treated in the mother, when untreated it can have devastating effects on the health of the baby. Our goal is to ensure that males and females have access to education and resources to promote sexual health.

Area Health Services⁷

A listing of existing health care facilities and other resources:

The Primary and Core Based Statistical Area offers the following health facilities and resources:

- Methodist Healthcare System
- Methodist Healthcare Ministries
- Wesley Health and Wellness Center
- Bishop Ernest T. Dixon Jr. Clinic
- San Antonio Metro Health Department
- Bexar County Department of Community Resources
- Bandera County
- Comal County (CHRISTUS Santa Rosa)
- Guadalupe County (Guadalupe Regional Medical Center)
- Kendall County
- Medina County (Medina Healthcare)
- County Health Departments
- University Health System
- Audie L. Murphy Memorial VA Hospital
- San Antonio Army Medical Center
- CHRISTUS Santa Rosa
- Baptist Health System
- Nix Health
- Southwest General Hospital
- San Antonio State Hospital
- Barrio Comprehensive Family Health Center
- Centro Med
- La Mision Family Health
- Adolescent Pregnancy and Parenting Program
- Father Flanagan's Boys Town
- Center for Health Care Services
- Child Guidance Center
- Southwest Mental Health Center
- Warm Springs
- Dimmit County (Dimmit County Memorial Hospital)
- Kerr County (Peterson Regional Hospital)
- Kinney County
- Maverick County (Fort Duncan Regional Hospital)
- Uvalde County (Uvalde Memorial Hospital)
- Val Verde County (Val Verde Regional Hospital)
- Zavala County

⁷ The area health services listed is a sampling of the represented services available and is not all inclusive

Methodist Hospital's Community Health Improvement Plan based on the Community Health Needs Assessment

Community Health Priority No. 1: Healthy Eating and Active Living

Community Goal: To foster social change and strengthen positive behaviors around healthy eating and active living to ensure access to nutritious foods and built environments that enable all residents to make healthy choices and lead healthy lives.

Objective: To promote the number of residents in our community who eat healthy and engage in physically active behaviors.

Strategy: To provide education and assistance through literature, speaking seminars, health fairs, various other programs and partnerships with non-profits in the community and to leverage current system wide initiatives.

Tactics: In 2017, Methodist Hospital will implement the following tactics, with yearly updates through 2019:

- Provide diabetes education to patients. Methodist Hospital will monitor and report the number of classes and individual instruction provided to patients. Methodist Hospital anticipates at least 1,500 diabetes educator visits in 2017.
- Provide speakers for WomanPlus® and 55PLUS® program. Methodist anticipates at least four Methodist Hospital credentialed physicians will hold community speaking engagements in 2017.
- Provide San Antonio Food Bank collection and support. Methodist Hospital anticipates at least one cereal drive for all employees to support the San Antonio Food Bank in 2017.
- In collaboration with the system, participate in one HeartCheck® health fair by providing staff to volunteer. These health fairs will be held in lower socioeconomic neighborhoods providing the community with screenings for glucose, blood pressure, full lipid panel cholesterol and BMI checks, as well as literature. Methodist Healthcare anticipates screening 150 participants.
- Host one Cardiac Connections Series with focus on hypertension, diabetes and hyperlipidemia. Methodist Hospital anticipates 25 attendees in 2017.

Impact: Through the tactics listed above, Methodist Hospital will bring awareness to healthy eating and active living issues as well as contribute to the decrease the obesity, hypertension and diabetes rates.

Measurement:

- Attendance to events, seminars, classes and screenings
- Restocking literature
- Number of website views
- Percent increase in social media followers
- Percent increase in affinity group members

Key Partners:

- American Diabetes Association
- American Heart Association

- San Antonio Food Bank
- The Health Collaborative
- YMCA
- Sodexo

Community Health Priority No. 2: Healthy Child and Family Development

Community Goal: To make pregnancy and early childhood the focus of system level changes that support healthy child and family development.

Objective: To increase the number of programs that provide education on healthy child and family development.

Strategies:

- To promote prenatal, infant and early childhood care and support through education, nutrition, and active living

Tactics: In 2017, Methodist Hospital will implement the following tactics, with yearly updates through 2019:

- Offer the community parenting classes including Buckle Up Baby, Rocking Dads, Breastfeeding, Getting Ready for Childbirth and Tour, Pets and Your Baby, CPR, NICU (Neonatal Intensive Care Unit) CPR, Beyond Baby Blues Class (postpartum depression) and childbirth education classes offered in Spanish. Methodist Hospital anticipates 300 classes to be held in 2017.
- Continue providing the community with free lactation consultations (in person and by phone). Methodist Hospital anticipates a combined total of 5,000 consultations (including in person and by phone) in 2017.
- Distribute Call-a-Nurse magnets. The Call-a-Nurse program is a telephone service offering free medical advice by trained emergency care pediatric nurses to parents of sick/injured children. The Call-a-Nurse for Children service is available from 5 p.m. to 8 a.m. Monday through Friday and around the clock on weekends and holidays. Methodist Hospital anticipates distributing 200 magnets in 2017.
- Participate in the March of Dimes March for Babies. Methodist Hospital anticipates 20 walkers in 2017.

Impact: Through the tactics listed above, Methodist Hospital will bring awareness to healthy child and family development issues, as well as contribute to the decrease of complications in pregnancy, infant mortality rates and preventable childhood developments will decrease.

Measurement:

- Attendance to events, seminars, classes and screenings
- Restocking literature

- Number of website views
- Percent increase in social media followers
- Percent increase in affinity group members

Key Partners:

- March of Dimes
- The Health Collaborative
- San Antonio Metro Health
- AVANCE
- YMCA

Community Health Priority No. 3: Safe Communities

Community Goal: To develop safe neighborhoods by identifying what works locally, replicating success in our neighborhoods, and enhancing systems that respond effectively to community identified safety needs.

Objective: To partner with key organizations to develop effective tactics to make the community safer.

Strategy: To engage and partner with political leaders, neighborhood associations, safety officers, community groups, and other existing organizations in high risk areas to join in outreach efforts and arrange meetings in their areas

Tactics: In 2017, Methodist Hospital will implement the following tactics, with yearly updates through 2019:

- Work with South Texas Medical Foundation to make the medical center a safer place. Methodist Hospital will continue membership and participation in South Texas Medical Foundation to ensure safety in the area.
- Partner with Texas Poison Control Center Network to distribute literature. Methodist Hospital anticipates distributing 300 pieces of literature in 2017.
- Distribute literature on domestic violence in the hospital. Methodist Hospital anticipates distributing 100 pieces in 2017.

Impact: Through the tactics above, Methodist Hospital will bring awareness to safe community issues as well as contribute to safer neighboring communities and access to care.

Measurement:

- Attendance to events, seminars, classes and screenings
- Restocking literature
- Number of website views
- Percent increase in social media followers
- Percent increase in affinity group members

Key Partners:

- South Texas Medical Foundation
- The Health Collaborative

- San Antonio Police Department

Community Health Priority No. 4: Behavioral and Mental Well-Being

This community health priority is addressed as a system. Please refer to page 20 of the Methodist Healthcare System plan, Community Health Priority No. 4.

Community Health Priority No. 5: Sexual Health

Community Goal: To ensure that males and females have access to education and resources to promote sexual health.

Objectives:

- To increase community awareness regarding sexually transmitted diseases.
- To decrease the number of teen pregnancies

Strategies:

- To educate community about sexually transmitted diseases.
- To educate community about teen pregnancy through literature and seminars. Provide access with our Family Health Centers.

Tactics: In 2017, Methodist Hospital will implement the following tactics, with yearly updates through 2019:

- Promote STD education for community. Methodist Hospital will provide literature in waiting rooms and lobbies throughout hospital. Methodist Hospital anticipates providing 35 pieces of literature per month.
- Promote teen pregnancy awareness
 - Provide literature on teen pregnancy in waiting room and lobbies throughout the hospital. Methodist Hospital anticipates providing 35 pieces of literature per month.
 - Provide literature promoting the Methodist Family Health Centers in waiting rooms and lobbies throughout the hospital. Methodist Hospital anticipates providing 35 pieces of literature per month

Impact: Through the tactics above, Methodist Hospital will bring awareness to sexual health issues as well as contribute to the decrease in teen pregnancies and sexually transmitted diseases.

Measurement:

- Attendance to events, seminars, classes and screenings
- Restocking literature
- Number of website views
- Percent increase in social media followers
- Percent increase in affinity group members

Key Partners:

- San Antonio Metropolitan Health
- The Health Collaborative

- Physicians
- School Districts

Implementation of the Strategy

The implementation strategy, including an execution plan and prioritization of health needs, services and metrics for each hospital will be presented to and approved by the Community Benefits Committee, Methodist Healthcare Community Board, Methodist Healthcare Board of Governors and MHM.

The chief executive officer at each facility has appointed an advocate to work with the Methodist Healthcare Strategic Planning and Market Services Department to implement and monitor the plan. The hospital chief financial officer also has appointed a representative to attend the meetings to monitor budget adherence. These individuals form a committee that will meet twice a year.

Methodist Healthcare’s implementation strategy for each hospital facility includes:

- Communication plan
- Priority initiative work plans
- Role and responsibility assignments
- Measures/indicators for success along with baseline data

Additional monitoring of the plan will occur through the quarterly community benefits reports to the Community Benefits Committee and the annual charity care report compiled and distributed to the Community Benefits Committee.

Availability of the Community Health Needs Assessment and Implementation Plan

A digital version of the assessment and plan will be available on our website, www.SAHealth.com. A printed version will be distributed to employees and physicians and will be available to the public upon request.

Approval:

Methodist Hospital Chief Executive Officer (interim)
