Methodist Healthcare System is a 50-50 co-ownership between Methodist Healthcare Ministries, South Texas’ largest non-public funding source of community health care, contributing $976 million since 1995; and Hospital Corporation of America (HCA), the nation’s leading provider of health care services. Methodist Children’s Hospital (MCH) is one of the system’s nine acute care hospitals. MCH opened in 1998 as the only hospital in San Antonio and South Texas designed and built especially for children.

- The facility offers outstanding pediatric services in many specialty areas including pediatric heart surgery, pulmonology, orthopedics, neurosurgery, newborn and pediatric intensive care, oncology and emergency services.
- As one of few hospitals in the nation, MCH uses gaming and virtual technology to ease the anxieties of young patients, as well as nationally-recognized art therapy programs.
